

ERM / dinov2 | held-out art\_painting | fixed seed 100  
PCA explains 27.1% of source feature variance; 2-D slice is not the full boundary

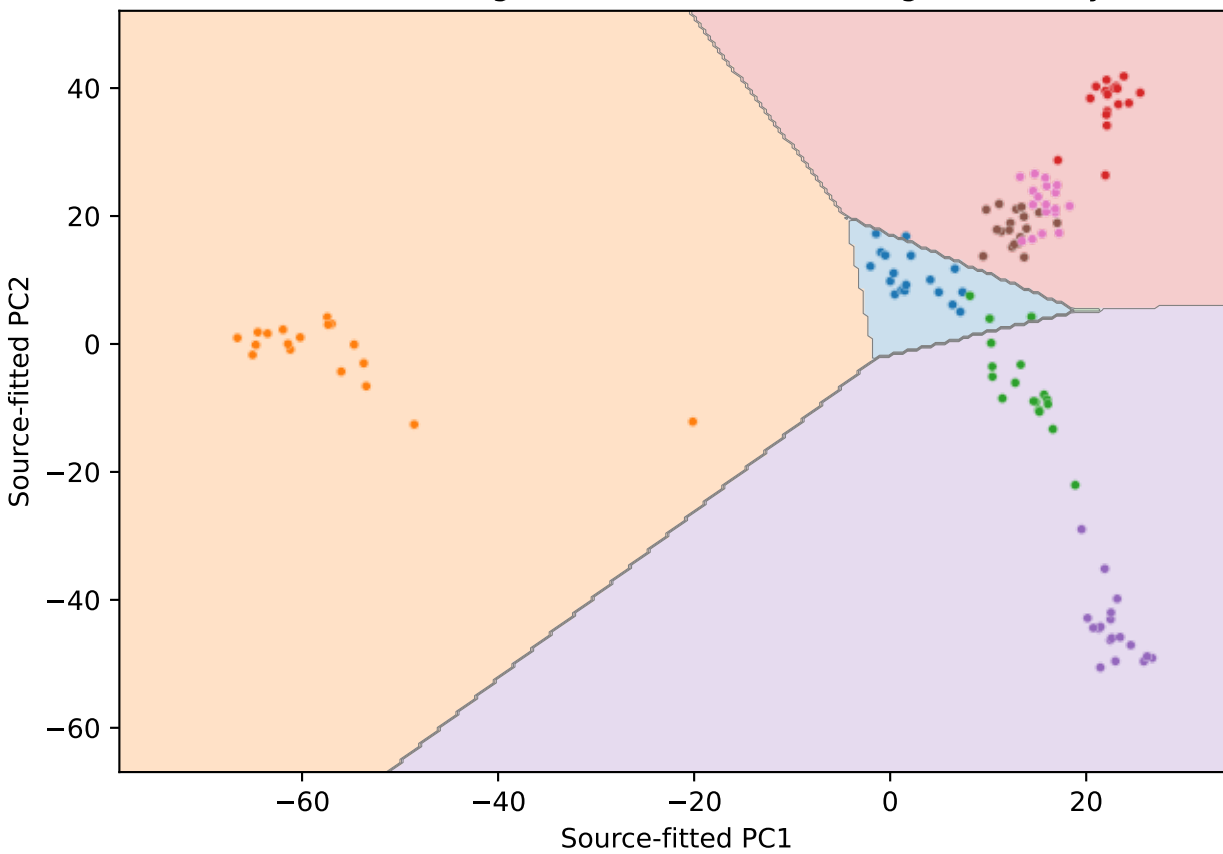

Representation PCA: color = true class

Same PCA coordinates: color = domain

Original classifier on PCA plane; target points  
Slice/full-head agreement: 46.1% (not target accuracy)

Actual full-feature classification margin  
Negative = error; positive = correct
