

ERM / resnet50_augmix | held-out cartoon | fixed seed 100
PCA explains 30.7% of source feature variance; 2-D slice is not the full boundary

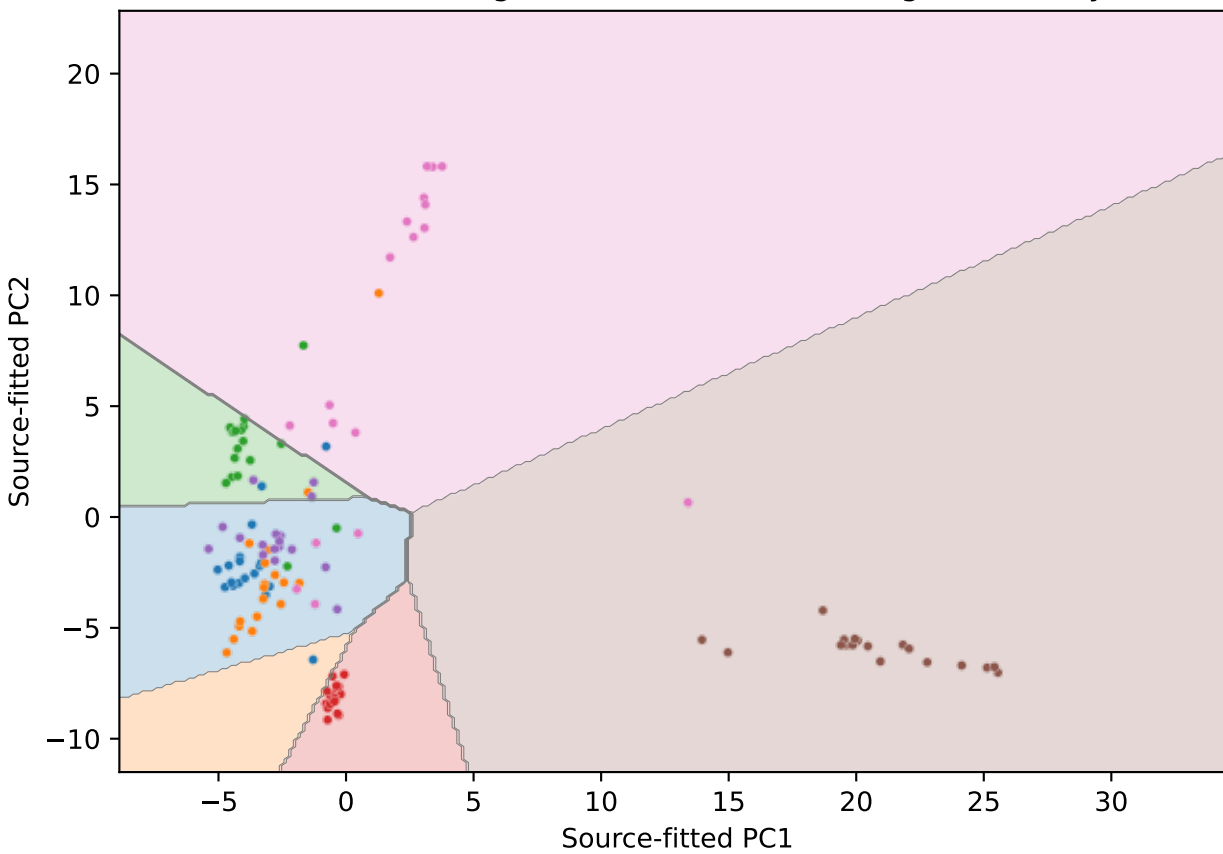

Representation PCA: color = true class

Same PCA coordinates: color = domain

Original classifier on PCA plane; target points
Slice/full-head agreement: 63.5% (not target accuracy)

Actual full-feature classification margin
Negative = error; positive = correct
